A

Abdominal wall, endometrioma of, **463:**221
ABJS Marshall Urist Award, **458:**202
ABJS Nicolas Andry Award, **459:**246
ABJS paper
  analysis of anatomic periarticular tibial plate fit on normal adults, **461:**245
  difference between the epicondylar and cylindrical axis of the knee, **461:**238
  dynamic intraoperative ligament balancing for total knee arthroplasty, **463:**208
  progressive cancellous and cortical bone remodeling after press-fit cup fixation, **463:**213
ABJS Workshop, **463:**2
Acetabular components/cups
  analysis of retrieved, **465:**140
  no migration of after prophylaxis for heterotopic ossification, **461:**125
  position, **465:**92
  quality of osteolysis grafting with cementless retention, **465:**150
  suctioning prevents emboli during insertion, **457:**150
Acetabular cysts of the hip, **454:**120
Acetabular defects, multislice computed tomography for evaluating, **463:**138
Acetabular dysplasia
  hip subluxation, **457:**247
Acetabular liners, **465:**133
Acetabular morphology, **458:**125
Acetabular osteotomy
  eccentric rotational, hip, **459:**195
  osteoarthritis after, **459:**207
  rotational, hip, **459:**200
Acetabulum
  central fractures of, **465:**277
  intrapelvic protrusion of the, **465:**6
  metastaic disease of the, **459:**122
Achilles tendon
  repair, **458:**188
Achondroplasia, thoracic and lumbar pedicle morphometry in, **454:**180
Acromioclavicular joint
  injuries, **455:**38
  surgical treatment of symptomatic problems, **455:**30
Acromioplasty, arthroscopic versus open, **455:**64
Acute limb shortening, influence of soft tissue on bone regeneration after, **460:**202
ACVR1 (R206H) mutation, functional modeling of, **462:**87
Allograft
  mesenchymal stem cell and osteoblasts, **457:**220
  osteoarticular, distal tibial, **459:**92
  soaking morselized in bisphosphonate can impair implant fixation, **463:**195
Anatomic burden of patients, evaluation of, **462:**73
Anesthesia epidural and warfarin, **454:**133
Ankle
  fracture
    passive dorsiflexion flexibility after cast immobilization, **454:**65
  osteoarthritis, realignment surgery as alternative treatment of varus and valgus, **462:**156
  osteomyelitis, clinical experience with daptomycin treatment of foot or, **461:**35
  sprains
    acute treatment of inversion, **455:**169, **463:**250 (letter)
    syndesmosis of, **455:**173
  thinner plantar fascia predicts decreased pain after extracorporeal shock wave therapy, **460:**219
  tibiotalocalcaneal arthrodesis using a reamed retrograde locking nail, **463:**151
Ankylosis
  treatment on, **454:**9
Anterior cruciate ligament (ACL)
  anatomy of with regards to its two bundles, **454:**35
  computer evaluation of kinematics of, **463:**37
  dynamic function of during running after reconstruction, **454:**66
  impingement prediction based on MRI scans, **460:**210
  injured copers, **454:**74
  intraarticular rupture pattern of, **454:**48
  reconstruction of,
    bracing after, **455:**162
    double-bundle, **454:**100, 108
    endoscopic versus rear-entry, **455:**158
    knee stability, **454:**95, 100
    meta-analysis of functional scores, **458:**180
    persistence of the mini pivot shift, **457:**203
    using navigation to measure kinematics, **454:**59
  reconstruction with a hamstring graft, **454:**89
Antibiotics
  for local delivery systems cause skeletal cell toxicity in vitro, **462:**200
  perioperative should not be withheld in proven cases of periprosthetic infection, **461:**48
  sucrose, xylitol, and erythritol increase PMMA permeability for depot, **461:**60
  surgical débridement and parenteral in infected revision total knee arthroplasty, **461:**130
  timeliness of appropriate in hand infections, **461:**17
Aprotinin effect, randomized study of, **465:**189
Argon beam coagulation
  as an adjuvant for local control of giant cell tumor, **454:**192
Arthritis. *See also* Rheumatoid arthritis
  navigated shorter incision or smaller implant in knee, **463:**63
  patellofemoral, **464:**78
Arthrodesis
  fixation knee, **464:**11
  tibiotalocalcaneal using a reamed retrograde locking nail, **463:**151
Arthrogryposis
  genetics of, **454:**30
Arthrokatadysis of the hip joint, **465:**4

Arthropathy, cuff tear, **462:**67
Arthroplasty
elbow, **454:**110
joint
rise in the incidence of pulmonary embolus after, **463:**107
success of clinical pathways, **457:**133
hip
ceramic liner fracture, **458:**106
computed tomography-based surgical navigation for, **465:**100
drainage, **458:**101
evaluation of a new leg length measurement algorithm in, **463:**85
management of periacetabular bone loss in, **465:**159
minimally invasive, **458:**94
nonmodular flexible press-fit cup in primary, **461:**114
knee
alignments and clinical results, **457:**156
component malrotation, **458:**131
computer-assisted navigation, **454:**281
in the young patient, **464:**83
modular insert exchange in, **464:**132
serum metal ion exposure after total, **461:**136
similar results in high- and low-activity patients, **460:**165
surgical débridement and parenteral antibiotics in infected revision total, **461:**130
unicompartmental, **464:**32, 37
success of clinical pathways for total joint, **457:**133
reverse shoulder, **458:**78
revision, periprosthetic infection does not preclude good outcome for, **461:**54
shoulder
for traumatic avascular necrosis, **465:**208
recentering the humeral head for glenoid deficiency, **457:**124
outcomes of in Olmsted County, Minnesota, a population-based study, **455:**176
versus hip and knee arthroplasties, a comparison of outcomes, **455:**183
total hip
ceramic-on-ceramic, **465:**155
complex revision, **465:**166
emotional state of patient after, **463:**7
impact of resident teaching on, **465:**196
multislice computed tomography for evaluating acetabular defects in revision, **463:**138
navigation reduces the learning curve in resurfacing, **463:**90
obesity, role of on the risk of, **465:**185
polyethylene in, **465:**122
range of motion after, **465:**180
symptomatic thromboembolism after one-stage bilateral, **463:**114
thigh mass resulting from polyethylene wear of revision, **455:**274
time to revision of primary is shorter for specialists than nonspecialists, **465:**175
uncemented CLS stem in, **454:**127
total knee
bearing surface design changes affect contact patterns in, **464:**127
bilateral, **464:**65
comparison of acetate and digital templating for, **464:**179
computer-assisted navigation increases precision of component coronal plane stability before and after, **463:**43
dynamic intraoperative ligament balancing for, **463:**208
emotional state of patient after, **463:**7
factors affecting flexion after, **464:**53
for isolated patellofemoral arthritis, **464:**78
high-flexion, **464:**117
mechanical calf compression for, **464:**61
minimally invasive versus standard approach in, **463:**144
obesity, role of on the risk of, **465:**185
placement in (letter), **454:**281
rehabilitation treatment of poorly functioning, **464:**138
revision, **464:**146
morbidity of, **464:**151
robot-assisted, **464:**111
science of minimally invasive, **463:**74
sterilization and wear-related failure in condylar, **464:**16
using a pie-crusting technique, **464:**73
using navigation intraoperative measurements narrows range of, **463:**50
total joint
economic considerations in minimally invasive, **463:**20
economic issues in computer-assisted, **463:**26
implant selection and cost for, **457:**57
Arthroscopy
hip, **454:**128
Arthrosis, lumbar facet, **464:**184
Asymmetric wear, mobile-bearing knees reduce rotational, **462:**143
Autologous chondrocyte implantation, **455:**253
Awards
ABJS Marshall Urist, **458:**202
ABJS Nicolas Andry, **459:**246
Chitranjan Ranawat, **464:**11

B

Bacteria
detection of biofilm-formative around a metal implant, **457:**210
Biconical threaded cup, good stability and minimal osteolysis with a, **463:**128
Bisphosphonate, soaking morselized allograft in, **463:**195
Bone
allografts
impacted, femoral fractures in revision hip surgeries with, **462:**130
vancomycin-supplemented cancellous in hip revision surgery, **461:**74
defects, reconstruction of using rhBMP-2-coated devitalized bone, **461:**162
echinococcus disease of, **458:**220
landmarks are more reliable than tensioned gaps in TKA component alignment, **462:**137
phalangeal, mass on, **458:**229
Bone graft
autogenous, **454:**196
for large bone cysts of the femoral neck in patients on hemodialysis, **461:**175
Bone lesion
lytic in the phalanx, **459:**270

Bone marrow, **454:**233
edema, **454:**155
stem cells, **465:**202
Bone remodeling, progressive cancellous and, **463:**213
Bone sarcoma
hemicortical excision for, **459:**161
is similar to primary osteosarcoma (letter), **462:**255
quality of life in children with, **459:**34
Bone tumors
Are fibula strut allografts a reliable alternative for periarticular reconstruction after curettage for, **461:**170
resection of, **454:**211
rotationplasty for, **459:**76
Brighton, C.T., **463:**2

C

Calcaneus
crush fracture, **458:**241
Calcium sulfate, elution behavior of daptomycin-loaded pellets, **461:**68
Calcium sulfate-calcium phosphate composite graft, **459:**110
Calf compression, mechanical, **464:**61
Canine patellar tendon reattachment, **463:**202
Carpi ulnaris, split flexor, **455:**262
Cartilage, cell viability and protein composition in cryopreserved, **460:**234
Cell toxicity, antibiotics for local delivery systems cause, **462:**200
Cement restrictor function, **458:**111
Cementless revision stems, modified transfemoral approach using modular, **462:**105
Cementless TKA, **464:**93
Central nervous system, method of investigating the deep ganglia and tracts of, **463:**3
Cerebellum. *See also* Central nervous system
Cerebral palsy, incomplete transiliac osteotomy in skeletally mature adolescents with, **462:**169
Chemotherapy
effect on initial compressive osseointegration, **459:**48
neoadjuvant for soft tissue sarcoma, **455:**219
Children. *See also* Pediatrics
Chitranjan Ranawat Award, **464:**11
Chondral defects, IL-1ra/IGF-1 gene therapy modulates repair of microfractured, **462:**221
Chondrocyte
autologous implantation improves patellofemoral cartilage treatment outcomes, **463:**187
phenotyping of in vivo and in vitro using cDNA array technology, **460:**226
Chondrosarcoma
does local recurrence impact survival in low-grade, **462:**175
grade 1 periacetabular, **459:**146
national cancer data base report, **459:**40
surgical management of conventional grade I, **463:**166
CLS stem
early migration pattern of the uncemented in total hip arthroplasties, **454:**127
Clubfoot
absence of HOXD10 mutations in idiopathic and sporadic vertical talus, **462:**27
apoptotic gene analysis in idiopathic talipes equinovarus, **462:**32

indications for repair, **455:**52
injury, **458:**70
novel double-row repair exceeds strengths of conventional repairs, **461:**106
Ruptures, reconstruction after chronic extensor pollicis longus, **462:**93

S

Sarcoma
bone is similar to primary osteosarcoma (letter), **462:**255
does length of symptoms before diagnosis of affect patient survival, **462:**181
Ewing's, **459:**40
indeterminate pulmonary nodules in patients with, **459:**118
osteogenic, **465:**265
soft-tissue, **459:**174, 182
Scapular endoprosthesis, **454:**188
Scapular winging, **461:**258
Scapulectomy, partial, **457:**171
Schwannomas, definition of the target sign and its use for the diagnosis of, **464:**224
Scriveners' palsy, **458:**42
Scoliosis
a critical analysis of methods of fusion for, **460:**21
idiopathic
genetic association of complex traits of, **462:**38
genetic association study of growth hormone receptor and, **462:**53
genetics of familial, **462:**6
molecular determinants of melatonin signaling disfunction in adolescent, **462:**45
Screw placement, accuracy of computer-assisted percutaneous iliosacral, **463:**179
Semilunar cartilages, total excision of, **455:**285
Serial sarcomere, **454:**250
Shoulder
arthroplasty
for traumatic avascular necrosis, **465:**208
recentering the humeral head for glenoid deficiency, **457:**124
outcomes of in Olmsted County, Minnesota, a population-based study, **455:**176
versus hip and knee arthroplasties, a comparison of outcomes, **455:**183
novel double-row rotator cuff repair exceeds strengths of conventional repairs, **461:**106
reverse arthroplasty, **458:**78
primary frozen, **454:**79
rotator cuff injury, **458:**70
spontaneous clostridium perfringens myonecrosis of the, **461:**20
supraspinatus tear repair, **458:**63
temporal variations in a modified neer impingement test, **460:**130
use of corticosteriods in, **454:**275
vibration signals, **454:**103
Six Sigma analysis, **464:**105
Slipped capital femoral epiphysis (SCFE) deformity, **454:**163
Soft-tissue sarcoma
cryoablation and resection influences on survival, **459:**174
resection volume associated with wound-healing complications, **459:**182
Spinal cord
injury of, **454:**98
Spinal deformities, an operation for progressive, **460:**17
Spinal stenosis, treatment of, **458:**90
Spine
buckling collapse of in childhood spinal tuberculosis, **460:**86
cervical
pedicle screw fixation of the, **462:**99
osteoblastomas, surgical management of, **455:**190
treatment of tuberculosis, **460:**67, 78
curvature of, **460:**4
lumbar
facet arthrosis, **464:**184
pedicle morphometry in achondroplasia, **454:**180
postoperative infections of, **454:**114
prophylactic balloon kyphoplasty, **458:**83
thoracic
pedicle morphometry in achondroplasia, **454:**180
postoperative infections of, **454:**114
tuberculosis
autonomic dysfunction and adrenal insufficiency in thoracic, **460:**56
buckling collapse of in childhood spinal tuberculosis, **460:**86
kyphus correction in, **460:**117
of, **460:**2, 10, 29, 39
prediction of deformity in spinal, **455:**196
Sports
autologous chondrocyte implantation improves patellofemoral cartilage treatment outcomes, **463:**187
evidence-based medicine, **455:**2, 6, 18, 19
Staphylococcus aureus, higher risk of failure of methicillin-resistant prosthetic joint infections, **461:**48
Stecher, Robert M., **462:**257
Stem cells
mesenchymal and osteoblasts, **457:**220
Surgical procedures
should operations be regionalized, **457:**3
Surgical treatment
of lateral epicondylitis, **463:**98
Superior glenoid labral lesions, clinical assessment of, **455:**45
Survival probability, competing events influence estimated, **462:**229

Symptomatic acromioclavicular joint problems, surgical treatment of, **455:**30
Systematic Review, How to write a, **455:**23

T

Talus, absence of HOXD10 mutations in idiopathic clubfoot and sporadic vertical, **462:**27
TBX5 mutations
  novel in patients with Holt-Oram Syndrome, **462:**20
Tendon
  biceps repairs, infected distal, **461:**14
  flexor repairs, **456:**121
Thigh
  fractures of, **458:**52
Third body embedment with rim damage, **465:**133
Thromboembolism, symptomatic after one-stage bilateral THA, **463:**114
Tibia
  osteomyelitis, novel technique for medullary canal débridement in femur and, **461:**31
  segmental fractures, **460:**196
Tibial
  cartilage, dynamic biomechanics correlate with histopathology in human, **462:**212
  components, excellent survival of all-polyethylene, **464:**88
  defects with divergent screws and cement, **459:**167
